

## Job Description:

Java selenium

## Generated Questions

No.	Questions
1	Can you explain the difference between implicit and explicit waits in Selenium WebDriver? Provide examples of when you would use each.
2	Describe a challenging automation scenario you've encountered in your projects. How did you approach it, and what was the solution?
3	How do you handle dynamic web elements in your Selenium tests? Can you provide an example of using XPath or CSS selectors for such elements?
4	Explain the Page Object Model design pattern and how you've implemented it in your test automation framework.
5	What strategies do you use for test data management in your Selenium projects? How do you handle different test environments?
6	Can you walk me through your process for debugging a failing Selenium test? What tools or techniques do you typically use?
7	How do you ensure the reliability and maintainability of your Selenium test suite? Describe any best practices you follow.
8	Explain how you would implement parallel test execution in a Selenium-Java framework. What challenges might you face, and how would you address them?
9	Describe your experience with continuous integration tools (e.g., Jenkins) in the context of Selenium test automation. How have you integrated your tests into the CI/CD pipeline?
10	Can you discuss a situation where you had to optimize the performance of your Selenium tests? What approaches did you take, and what was the outcome?
