

Job Description:

playwright with java

Generated Questions

| No. | Questions |
|-----|---|
| 1 | Can you describe your experience with Playwright for Java? What are some key features that make it suitable for automated testing? |
| 2 | How would you set up a basic Playwright test framework in a Java project? Please outline the steps and necessary dependencies. |
| 3 | Explain the concept of selectors in Playwright. How do they differ from traditional Selenium selectors, and what advantages do they offer? |
| 4 | Can you provide an example of how you would handle dynamic content or AJAX requests in a Playwright test? |
| 5 | Describe a challenging scenario you encountered while using Playwright for testing, and how you resolved it. |
| 6 | How would you implement parallel test execution in a Playwright Java project? What considerations should be taken into account? |
| 7 | Explain the concept of Page Object Model (POM) and how you would implement it in a Playwright Java framework. |
| 8 | How do you handle browser contexts and isolation between tests in Playwright? Why is this important? |
| 9 | Can you describe how you would integrate Playwright tests into a CI/CD pipeline? What tools or practices would you recommend? |
| 10 | What strategies do you use for maintaining and scaling a large suite of Playwright tests? How do you ensure test reliability and performance? |
