

Job Description:

Java selenium

Generated Questions

No.	Questions
1	Can you explain the difference between TestNG and JUnit in Selenium testing, and provide an example of when you would choose one over the other?
2	Describe a challenging scenario you encountered while implementing Page Object Model in a Selenium project. How did you resolve it?
3	How would you handle dynamic web elements in Selenium? Can you provide an example of using explicit waits to deal with such elements?
4	Explain the concept of data-driven testing in Selenium. How would you implement it using Java?
5	Can you walk me through your approach to creating a custom Selenium WebDriver listener? What events would you typically want to track?
6	How do you manage test data in your Selenium projects? Describe a situation where you had to deal with large amounts of test data efficiently.
7	Explain how you would integrate Selenium tests with a Continuous Integration/Continuous Deployment (CI/CD) pipeline. What tools have you used for this purpose?
8	Can you describe a situation where you had to optimize the performance of your Selenium test suite? What strategies did you employ?
9	How would you approach testing a complex web application with multiple iframes and dynamic content using Selenium and Java?
10	Describe your experience with BDD frameworks like Cucumber in conjunction with Selenium. How do you structure your feature files and step definitions?
