

Job Description:

playwright with java

Generated Questions

No.	Questions
1	Can you explain the key differences between Playwright and Selenium for web automation testing, particularly in the context of Java-based projects?
2	Describe a challenging scenario you encountered while using Playwright with Java, and how you resolved it.
3	How would you implement parallel test execution in a Playwright-Java framework to improve test suite performance?
4	Can you walk me through the process of setting up a Playwright project with Java, including necessary dependencies and initial configuration?
5	What strategies do you employ to handle dynamic elements and AJAX-based content when writing Playwright tests in Java?
6	How would you integrate Playwright tests written in Java with a Continuous Integration/Continuous Deployment (CI/CD) pipeline?
7	Can you explain how you would use Playwright's network interception capabilities in Java to mock API responses for testing purposes?
8	Describe your approach to implementing a Page Object Model (POM) design pattern in a Playwright-Java test automation framework.
9	How would you handle cross-browser testing using Playwright with Java, and what considerations would you keep in mind?
10	Can you discuss your experience with debugging Playwright tests in Java, including any tools or techniques you find particularly useful?
