

Job Description:

Java selenium

Generated Questions

| No. | Questions |
|-----|--|
| 1 | Can you explain the difference between implicit and explicit waits in Selenium WebDriver? Provide examples of when you would use each. |
| 2 | Describe a challenging automation scenario you've encountered in your projects. How did you overcome it using Java and Selenium? |
| 3 | How do you handle dynamic elements in Selenium? Can you provide an example of using XPath or CSS selectors for locating such elements? |
| 4 | Explain the Page Object Model (POM) design pattern. How have you implemented it in your test automation framework? |
| 5 | What strategies do you use for test data management in your Selenium projects? How do you handle different test environments? |
| 6 | Can you describe how you've integrated your Selenium tests with a Continuous Integration/Continuous Deployment (CI/CD) pipeline? |
| 7 | How do you handle browser compatibility testing? What challenges have you faced and how did you resolve them? |
| 8 | Explain how you would use Java streams and lambda expressions to process and filter test data in your automation scripts. |
| 9 | Describe your experience with BDD frameworks like Cucumber. How have you integrated it with Selenium and Java in your projects? |
| 10 | What strategies do you employ for maintaining and updating your Selenium test suite as the application under test evolves? |
