

Job Description:

Java selenium

Generated Questions

No.	Questions
1	Can you explain the difference between implicit and explicit waits in Selenium WebDriver? Provide examples of when you would use each type.
2	Describe a challenging automation scenario you've encountered in your projects. How did you overcome it using Java and Selenium?
3	How do you handle dynamic web elements in your Selenium tests? Can you provide an example of using XPath or CSS selectors for such elements?
4	Explain the Page Object Model (POM) design pattern and how you've implemented it in your test automation framework.
5	What strategies do you use for test data management in your Selenium projects? How do you handle different test environments?
6	Can you walk me through your approach to creating a custom Selenium WebDriver wait condition? Provide a code example.
7	How do you integrate your Selenium tests with Continuous Integration/Continuous Deployment (CI/CD) pipelines? What tools have you used for this purpose?
8	Describe your experience with handling iframes, pop-ups, and multiple browser windows in Selenium WebDriver tests.
9	How do you ensure the reliability and maintainability of your Selenium test suite? What best practices do you follow?
10	Can you explain how you would implement parallel test execution in a Selenium-Java framework? What challenges might you face, and how would you address them?
