

Job Description:

Java selenium

Generated Questions

No.	Questions
1	Can you explain the difference between implicit and explicit waits in Selenium WebDriver? When would you use each type?
2	Describe a challenging automation scenario you've encountered in a past project. How did you overcome it using Java and Selenium?
3	How would you handle dynamic elements with changing IDs or classes in your Selenium test scripts?
4	Can you walk me through the process of implementing a Page Object Model in your Selenium framework? What are its benefits?
5	Explain how you would use Java streams and lambda expressions to process and filter test data in your automation scripts.
6	What strategies do you employ to make your Selenium tests more robust and less flaky?
7	How would you integrate your Selenium tests with a Continuous Integration/Continuous Deployment (CI/CD) pipeline?
8	Can you describe how you would implement data-driven testing using Java and Selenium? What external libraries or frameworks might you use?
9	Explain the concept of TestNG listeners and how you might use them to enhance your Selenium test suite.
10	How would you approach testing a complex web application with multiple iframes and AJAX requests using Java and Selenium?
