Job Description:

API testing using rest assured

Generated Questions

No.	Questions
1	Can you explain the key components of a REST API and how they differ from SOAP APIs?
2	What are the main HTTP methods used in RESTful APIs, and in which scenarios would you use each one?
3	How do you handle authentication and authorization in REST API testing using Rest Assured?
4	Can you describe the process of setting up a basic Rest Assured test, including any necessary dependencies and configurations?
5	What are some best practices for writing maintainable and scalable API tests using Rest Assured?
6	How would you approach testing different response formats (JSON, XML, etc.) using Rest Assured?
7	Can you explain how to use Rest Assured for parameterized testing and data-driven testing?
8	What strategies do you use for handling and validating complex JSON responses in Rest Assured?
9	How would you integrate Rest Assured tests into a continuous integration/continuous deployment (CI/CD) pipeline?
10	Can you describe a challenging API testing scenario you've encountered and how you resolved it using Rest Assured?
