# Job Description:

testNG framework

## Generated Questions

| No. | Questions |
|-----|-----------|
| 1 | Can you explain the main advantages of using TestNG over JUnit? How have you leveraged these advantages in your previous projects? |
| 2 | Describe the TestNG annotations you're familiar with and provide examples of how you've used them in your test scripts. |
| 3 | How do you implement data-driven testing in TestNG? Can you walk me through an example from your experience? |
| 4 | What strategies have you used for test parallelization in TestNG? How did you handle any challenges that arose? |
| 5 | Can you explain the concept of test dependencies in TestNG? Provide an example of when you've used them and why. |
| 6 | How do you integrate TestNG with Continuous Integration/Continuous Deployment (CI/CD) pipelines? What tools have you used for this integration? |
| 7 | Describe a complex test scenario you've implemented using TestNG. What were the main challenges and how did you overcome them? |
| 8 | How do you handle test configuration and parameter passing in TestNG? Can you compare this with other testing frameworks you've used? |
| 9 | Can you explain how you've used TestNG for API testing? What additional libraries or tools did you integrate with TestNG for this purpose? |
| 10 | How do you approach test reporting in TestNG? What customizations have you made to improve the readability and usefulness of test reports? |
