Job Description:

playwright with java

Generated Questions

No.	Questions
1	Can you explain the key differences between Playwright and Selenium for web automation testing, particularly in the context of Java-based projects?
2	Describe a challenging scenario you've encountered while using Playwright with Java, and how you resolved it.
3	How would you implement parallel test execution in a Playwright-Java framework? What considerations should be taken into account?
4	Can you walk me through the process of setting up a Playwright project with Java, including necessary dependencies and initial configuration?
5	What strategies do you employ for handling dynamic elements and AJAX-based content in Playwright tests?
6	How would you integrate Playwright tests into a CI/CD pipeline? What tools or practices would you recommend?
7	Explain how you would use Playwright's network interception capabilities to test an application's behavior under different network conditions.
8	Can you describe your experience with creating custom Playwright assertions or extensions in Java? Provide an example if possible.
9	How do you approach cross-browser testing using Playwright with Java? What challenges have you faced and how did you overcome them?
10	Discuss your strategy for maintaining and scaling a large suite of Playwright tests in a Java-based project. How do you ensure test reliability and performance?
