Job Description:

testNG framework

Generated Questions

No.	Questions
1	Can you explain the main advantages of using TestNG over JUnit? How have you leveraged these advantages in your past projects?
2	Describe the TestNG annotations you're familiar with and provide examples of how you've used them in your test scripts.
3	How do you handle test dependencies in TestNG? Can you provide an example of a scenario where you've used test dependencies?
4	Explain the concept of parallel execution in TestNG. How have you implemented it in your previous work?
5	What strategies do you use for data-driven testing in TestNG? Can you walk me through an example from your experience?
6	How do you integrate TestNG with Selenium WebDriver? Describe a complex test scenario you've automated using this combination.
7	Can you explain the difference between @BeforeMethod and @BeforeTest annotations in TestNG? In what situations would you choose one over the other?
8	How do you handle test failures and retries in TestNG? Have you implemented any custom listeners, and if so, for what purpose?
9	Describe your experience with TestNG's reporting capabilities. Have you customized TestNG reports, and if so, how?
10	Can you discuss a challenging testing scenario you encountered and how you solved it using TestNG's features?
