Job Description:

testNG framework

Generated Questions

No.	Questions
1	Can you explain the key features and advantages of TestNG framework compared to other testing frameworks like JUnit?
2	How do you configure test groups in TestNG? Provide an example of when and why you would use test groups.
3	Describe the TestNG annotations you're familiar with and their purposes. How do they differ from JUnit annotations?
4	Can you walk me through the process of creating a data-driven test using TestNG? What are the benefits of this approach?
5	How do you handle dependencies between test methods in TestNG? Provide an example scenario where this would be useful.
6	Explain how you would implement parallel test execution in TestNG. What are the potential challenges and how would you address them?
7	Can you describe a situation where you used TestNG listeners in a project? What was the purpose and outcome?
8	How do you integrate TestNG with Selenium WebDriver for web application testing? Provide an example of a test case you might write.
9	What strategies do you use for test report generation in TestNG? How do you customize reports for different stakeholders?
10	Can you explain how you would set up a TestNG project with Maven? What are the key components of the pom.xml file for TestNG integration?
